Brussels Airport – Summer 2022 (S22)

Dear colleagues,

In the context of COVID-19 outbreak, service providers at Brussels Airport must make the best usage of their resources to guarantee the quality of services to their customers. This forces Brussels Airport Company to apply new restrictions for **departure** of flights carrying passengers during the night.

Brussels Airport Company published one NOTAM that is limiting the hours of operations for **departures** of flights carrying passengers for the period from 8 July until 5 September 2022.

A) EBBR B) 2207082200 C) 2209050330
E) DUE TO TERMINAL CAPACITY RESTRICTIONS, SCHEDULED PASSENGER DEPARTURE FLIGHTS ARE PROHIBITED BETWEEN 22H00 AND 03H30 WITH EXCEPTION OF OPERATIONALLY DELAYED FLIGHTS)*

Belgium Slot Coordination (BSC), the airport slot coordinator at Brussels Airport, set-up new coordination parameters for the period 8 July to 5 September to restrict the slot allocation of new flights intending to operate departures of passenger flights accordingly. No airport slot will be allocated for departure of flights carrying passengers in the night and flights that were already confirmed will be provided a new airport slot for a departure outside of the periods of restrictions.

Best regards,

Belgium Slot Coordination
