Brussels Airport – Summer 2023 (S23)

Dear colleagues,

Due to terminal restrictions with the actual capacity available, service providers at Brussels Airport must make the best usage of their resources to guarantee the quality of services to their customers. This forces Brussels Airport Company to apply new restrictions for additional **departures** of flights carrying passengers during the night. Brussels Airport Company published one NOTAM that is limiting the hours of operations for additional **departures** of flights carrying passengers for the period from 22 June until 31

A2812/23

From: 22 JUN 23 11:35 Till: 31 AUG 23 21:59

Text: DUE TO TERMINAL RESTRICTIONS WITH THE ACTUAL PLANNED CAPACITY, NO EXTRA PASSENGER DEPARTURE FLIGHTS WILL BE ACCEPTED BETWEEN 21H00 UTC AND 03H45 UTC WITH EXCEPTION OF OPERATIONALLY DELAYED FLIGHTS.

August 2023.

Belgium Slot Coordination (BSC), the airport slot coordinator at Brussels Airport, set-up new coordination parameters for the period of the NOTAM to restrict the slot allocation of new flights intending to operate departures of passenger flights. No airport slot will be allocated for new departure flights carrying passengers in the night. Flights that were already confirmed an airport slot for the departure of a flight carrying passengers in that period can operate on schedule as per the airport slot allocated.

Best regards,

Belgium Slot Coordination
